PROFILE

Senior Flutter Developer with 6+ years of experience building and leading cross-platform mobile apps for Android, iOS, and desktop. I've delivered 30+ applications across fintech, POS, food delivery, healthcare, and e-commerce, with 10+ published on the App Store and Play Store. Skilled in clean architecture, testing, and agile delivery, with a focus on high-quality products shipped on time.

TECHNICAL SKILLS

- **Languages:** Dart, Java, Kotlin, Swift, C#, SQL
- **Mobile & Desktop:** Flutter (Android, iOS, Windows, macOS), Xamarin, Native Android
- **Architecture:** Clean Architecture, MVVM, MVC, Dependency Injection
- **State Management:** BLoC, Riverpod, Provider, GetX
- **Backend & APIs:** Firebase, REST APIs (Dio, HTTP), FCM, MQTT, MySQL, SQLite
- **Integrations:** PayPal, KYC SDKs, Google APIs, Method Channels, Platform Views
- **Testing & CI/CD:** Unit/Widget/Integration Testing, TDD, GitHub Actions, Bitbucket Pipelines, Xcode
- **Tools:** Git, GitHub, GitLab, Bitbucket, Jira, Trello, Android Studio, Xcode, VS Code

CORE COMPETENCIES

- Lead mobile teams from requirements and architecture through release and production support.
- Design scalable, maintainable app architectures that are easy to test and extend.
- Build polished, high-performance UIs that work consistently across platforms.
- Integrate complex systems, including POS, payments, real-time data, and native device features.
- Raise code quality through testing, code reviews, and automated pipelines.
- Ship and maintain apps on the App Store and Play Store, handling the full release process.
- Turn business requirements into practical technical solutions with clear client communication.
- Deliver on time in agile teams by planning and prioritizing well.

PROFESSIONAL EXPERIENCE

Lead Flutter Developer Oct 2024 – Present

GoOrderz kft.

As a full-time Lead Flutter Developer at www.goorderz.hu, a Hungary-based POS and Food delivery service provider, I developed and manage the cross-platform apps.

Responsibilities & Achievements

- Led the mobile application development lifecycle using Flutter, ensuring optimal functionality and performance across platforms.
- Oversaw POS integrations and AI-driven services within mobile applications to align with strategic business objectives.
- Improved application stability and user experience through dedicated debugging, performance optimization, and continuous testing.
- Collaborated with cross-functional teams to ensure seamless integration between back-end systems and front-end user interfaces.

- Built scalable features for POS and food delivery apps, supporting business growth while maintaining clean, well-tested code.
- Developed scalable modules used across 7 apps, maintaining high-quality code through reviews and testing.
- Executed regular updates and maintenance to keep pace with evolving technology trends and user expectations.
- **Developed Applications:**
  - **TZ-Assembly:** (Warehouse, Worker & QC Apps) A connected app suite for managing warehouse stock and locations, tracking worker progress, and running quality-control checks.
  - **Prior Cash:** (Android, iOS, Windows) A point-of-sale app with adaptive phone and tablet layouts, managing products and categories, carts, receipt printing, and cash drawer control.
  - **GoPOS:** (Android, Windows) A cafe and restaurant POS system for managing tables, orders, kitchen workflow, payments, and sales reports.
  - **Legrand:** (Android) An IoT control app that uses MQTT to manage connected devices.
  - **Visit Szentes:** (Android, iOS) A local tourism guide app for Szentes, helping visitors explore nearby attractions, places, and events.
  - **Baby Sitter:** (Android, iOS) A mobile app that connects parents with trusted local babysitters.
  - **Clap & Go:** (Android, iOS) A Hungarian food and grocery delivery app for ordering door-to-door from local restaurants, cafés, and shops.

Senior Flutter Developer Jun 2023 – Oct 2024

Genesis IT Lab (Ex_RNS Solutions)

As a full-time Senior Mobile App Developer at www.genesislab.com, a Singapore-based Blockchain and AI software service provider, I developed and managed the company's mobile apps.

Responsibilities & Achievements

- Spearheaded collaboration between developers, business analysts, and solution architects to design and implement Flutter-based applications, reducing project turnaround time by 10%.
- Created UI screens and modules for Android and iOS using Flutter.
- Attended client meetings to gather requirements and deliver tailored mobile solutions, improving client satisfaction by 20%.
- Architected Android and iOS user interfaces that increased user engagement by 15% and improved retention.
- Led unit and widget testing efforts, increasing code coverage to 80% and reducing bug-related incidents by 30%.
- Wrote clean, scalable, and testable code as part of a team using Dart/Flutter for Android and iOS.
- Streamlined deployment by automating builds and ensuring timely app releases on the App Store and Play Store.
- Communicated with clients from a technical perspective during meetings.
- Documented code and tested contributions in an agile environment.
- **Developed Applications:**
  - **Cashero** – A fintech application to send and receive money worldwide.
  - **MyB** – A Web 3.0 service; users earn rewards exchangeable for mobile coupons, collect badges, and earn extra rewards by completing a spending-habit quiz.
    - play.google.com/store/apps/details?id=im.myb.android
    - apps.apple.com/kr/app/id6476365625

- **SuperBooking Consumer** – A system to book services provided by businesses.
- **SuperBooking Business** – A system to manage businesses and bookings.
- **Jomor** – A ticket-buying system using crypto and fiat wallets.
- **Deplug** – A power management app connected to AI-powered smart hardware, with integrated digital wallets for in-app energy purchases and payments.
- **Unice:** A social networking app with video and audio calling, real-time chat, live translation, and friend connections, plus wallet-based credit purchases.

Mobile App Developer Sep 2020 – May 2023

IT Virtual House

As a full-time Mobile App Developer at www.itvirtualhouse.com, an Australia-based medical service provider, I implemented and managed the company's mobile apps.

Responsibilities & Achievements

- Engineered maintainable, scalable code for Flutter and Xamarin applications, reducing app maintenance costs by 15%.
- Designed responsive Material UI, improving user experience and increasing user retention by 20%.
- Wrote REST APIs using PHP and MySQL.
- Integrated PayPal Payment Gateway, Google API, and Medical E-Claims API.
- **Developed Applications:**
  - **Konjac Skin Food** – E-commerce app for beauty and skincare products.
  - **13Cure – Doctor Home Visit** – Android & iOS app to book a doctor's home visit.
    - play.google.com/store/apps/details?id=com.curehome.doctorservice
    - apps.apple.com/us/app/cure-home-doctor-service/id1110123056
  - **Prime Medic AU – Consult a Doctor** – Android & iOS app to book a clinic visit appointment.
    - play.google.com/store/apps/details?id=au.com.primemedic
    - apps.apple.com/us/app/prime-medic-online-clinic/id1503906417
  - **Arts Market Gallery** – Android & iOS app for buying art.
    - play.google.com/store/apps/details?id=com.prime.artgallery
    - apps.apple.com/in/app/arts-market-gallery/id1612064138
  - **Prime Medic PK – Patient Appointment Booking** – Built with Xamarin Android & Xamarin iOS.
    - play.google.com/store/apps/details?id=pk.com.primemedic
    - apps.apple.com/pk/app/prime-medic-find-book-doc/id1546715882
  - **AichiCars (Aichi Automobiles)** – Android & iOS car-buying app.

Android App Developer (Internship) Sep 2019 – Aug 2020

Ritchie Techs

- Wrote extensible and maintainable code as part of a team using Java, XML, and Android Studio.
- Excelled in rapidly prototyping new capabilities to confirm project feasibility.
- **Developed Android Applications:**
  - Real-time location tracking for university buses, News application, Language translation application, E-pharmacy application.

EDUCATION

BS (IT) Hons. 2015 – 2019

Bahauddin Zakariya University, Multan (Sahiwal Campus), Pakistan

- **CGPA:** 3.69 / 4.0
- **Final Year Project – Child Monitoring System:** A collaborative platform between parents and children to track a child's location, messages, call logs, contacts, and daily usage time. Native Android apps (Parent App & Child App) built with Firebase Realtime Database and Firestore.
