PROFILE

Experienced Flutter Developer with a passion for delivering high-impact mobile applications. Proven track record in spearheading projects that improve team performance and product quality. Adept at learning and integrating new technologies to solve complex business challenges, contributing to organizational growth and client satisfaction.

Expertise in writing code, debugging code, system testing, validation procedures, and documentation. Understand agile methodologies, Scrum Software Development, planning, implementation, and testing. Manage multiple tasks in a fast-paced environment and meet deadlines with effective planning. Expertise in work planning, scheduling, task prioritizing, and quality assurance.

TECHNICAL SKILLS

- **Programming Languages:** Dart, Java, C#, MySQL, SQLite, Kotlin, Swift
- **Mobile Development:** Flutter, Xamarin, Native Android (Java/XML), Platform-Specific Integrations in Flutter (Method Channel, Platform View)
- **State Management:** BLoC, GetX, Provider, Riverpod, Stateless/Stateful Widgets
- **Testing:** Unit Testing, Widget Testing, Integration Testing, Test-Driven Development
- **CI/CD:** GitLab, Bitbucket, Xcode Cloud, GitHub Actions
- **Version Control:** Git, GitHub, GitLab, Bitbucket
- **Cloud & Backend:** Firebase, REST APIs, MySQL, Google API, KYC SDK Integration, PayPal API Integration
- **Tools & Platforms:** Jira, GitLab, Redmine, Taiga, Trello, Android Studio, Xcode, VS Code

CORE COMPETENCIES

- Solution provider delivering Flutter application solutions to real-world problems per business needs.
- Expertise in writing and debugging code, system testing, validation procedures, and documentation.
- Understanding of agile methodologies and Scrum software development: planning, implementation, and testing.
- Manages multiple tasks in a fast-paced environment and meets deadlines through effective planning.
- Developed client relationships with creative strategies to resolve ever-changing customer needs.
- Expertise in work planning, scheduling, task prioritization, and quality assurance.
- Solid knowledge and practical experience in designing application architectures, applying design patterns, and building testing pipelines.
- Rich experience with Clean Architecture, MVVM and MVC design patterns, dependency injection, error handling, and test-driven development.
- Solid expertise in object-oriented programming and synchronous/asynchronous programming in real-world applications.
- Strong exposure to developing complex UI designs in cross-platform development.
- Years of experience using Jira for tracking development progress, code hosting on Git, GitHub, and Bitbucket, and Discord and Slack for communication.
- Expertise in Flutter notification integrations, including Flutter Local Notifications and Firebase Cloud Messaging (FCM).
- Experience integrating RESTful APIs in Flutter using Dio and HTTP packages.
- Skilled in Flutter state management (Provider, BLoC, GetX, Riverpod, InheritedWidget, Stateless/Stateful widgets) and Flutter animations with timers and tickers.

- Thorough knowledge of the mobile application development life cycle and its phases.
- High proficiency in third-party plugin integration with the Flutter framework.
- Proven experience deploying Flutter Android and iOS applications to the Play Store and App Store.
- Experience in platform-specific integration, i.e., Platform View and Method Channel.

PROFESSIONAL EXPERIENCE

Lead Flutter Developer Oct 2024 – Present
GoOrderz kft.

As a full-time Lead Flutter Developer at www.goorderz.hu, a Hungary-based POS and Food delivery service provider, I was responsible for developing and managing the cross platform apps.

Responsibilities & Achievements

- Leadership and management of the mobile application development lifecycle using Flutter, ensuring optimal functionality and performance across platforms.
- Oversight of POS integrations and AI-driven services within mobile applications to align with strategic business objectives.
- Improved application stability and user experience through dedicated debugging, performance optimization, and continuous testing.
- Collaboration with cross-functional teams to guarantee seamless integration between back-end systems and front-end user interfaces.
- Implemented scalable features designed to support organizational growth strategies while adhering to high coding standards.
- Execution of regular updates and maintenance to keep pace with evolving technology trends and user expectations.
- **Developed Applications:**
  - TZ-Assembly Warehouse App for Android and iOS
  - TZ-Assembly Worker App for Android and iOS
  - TZ-Assembly QC App for Android and iOS
  - Prior Cash POS for Android, iOS, macOS, Windows
  - GoPOS for Android, Windows
  - Legrand App for Android using MQTT.
  - Visit Szentes for Android, and iOS

Senior Flutter Developer Jun 2023 – Oct 2024
Genesis IT Lab (Ex RNS Solutions)

As a full-time Senior Mobile App Developer at www.genesislab.com, a Singapore-based Blockchain and AI software service provider, I developed and managed the company's mobile apps.

Responsibilities & Achievements

- Spearheaded collaboration between developers, business analysts, and solution architects to design and implement Flutter-based applications, reducing project turnaround time by 10%.
- Created UI screens and modules for Android and iOS using Flutter.
- Attended client meetings to gather requirements and deliver tailored mobile solutions, improving client satisfaction by 20%.
- Architected Android and iOS user interface that increased user engagement by 15% and improved customer retention.
- Led unit and widget testing efforts, increasing code coverage to 80% and reducing bug-related incidents by 30%.
- Wrote clean, scalable, and testable code as part of a team using Dart/Flutter for Android and iOS.
- Streamlined deployment by automating builds and ensuring timely app releases on the App Store and Play Store.
- Communicated with clients from a technical perceptive during meetings.
- Diagnosed and fixed bugs and submitted pull requests.

- Documented code and tested contributions in an agile environment.
- **Developed Applications:**
  - **Cashero** – A fintech application to send and receive money worldwide.
  - **MyB** – A Web 3.0 service prioritizing user privacy and data security through blockchain technology; users earn rewards exchangeable for mobile coupons, collect badges, and earn extra rewards by completing a spending-habit quiz.
    - play.google.com/store/apps/details?id=im.myb.android
    - apps.apple.com/kr/app/id6476365625
  - **SuperBooking Consumer** – A system to book services provided by businesses.
  - **SuperBooking Business** – A system to manage businesses and bookings.
  - **Jomor** – A ticket-buying system using crypto and fiat wallets.

Mobile App Developer Sep 2020 – May 2023
IT Virtual House

As a full-time Mobile App Developer at www.itvirtualhouse.com, an Australia-based medical service provider, I implemented and managed the company's mobile apps.

Responsibilities & Achievements

- Engineered maintainable and scalable code for Flutter and Xamarin applications, reducing app maintenance costs by 15%.
- Designed responsive Material UI, improving user experience and increasing user retention by 20%.
- Excelled in rapidly prototyping new capabilities to confirm project feasibility.
- Wrote REST APIs using PHP and MySQL.
- Integrated PayPal Payment Gateway, Google API, and Medical E-Claims API.
- **Developed Applications:**
  - **EKSFC** – E-commerce app for beauty and skincare products.
  - **13Cure – Doctor Home Visit** – Android & iOS app renewal using Flutter.
    - play.google.com/store/apps/details?id=com.curehome.doctorservice
    - apps.apple.com/us/app/cure-home-doctor-service/id1110123056
  - **Prime Medic – Consult a Doctor** – Android & iOS app renewal using Flutter.
    - play.google.com/store/apps/details?id=au.com.primemedic
    - apps.apple.com/us/app/prime-medic-online-clinic/id1503906417
  - **Arts Market Gallery** – Android & iOS app for buying art, built with Flutter.
    - play.google.com/store/apps/details?id=com.prime.artgallery
    - apps.apple.com/in/app/arts-market-gallery/id1612064138
  - **Prime Medic – Patient Appointment Booking** – Built with Xamarin Android & Xamarin iOS.
    - play.google.com/store/apps/details?id=pk.com.primemedic
    - apps.apple.com/pk/app/prime-medic-find-book-doc/id1546715882
  - **AichiCars (Aichi Automobiles)** – Android & iOS car-buying app built with Xamarin.
  - Android marketing app (app reviews, website views, YouTube views, subscribers and followers) using Xamarin Android – publish pending.
  - Android & iOS apps for disability support seekers and providers using Xamarin – publish pending.

Android App Developer (Internship) Sep 2019 – Aug 2020
Ritchie Techs

- Wrote extensible and maintainable code as part of a team using Java, XML, and Android Studio.
- Excelled in rapidly prototyping new capabilities to confirm project feasibility.
- **Developed Android Applications:**
  - Real-time location tracking for university buses
  - News application
  - Blog applications
  - Service provider app
  - Language translation application
  - E-pharmacy application

EDUCATION

BS (IT) Hons. 2015 – 2019

Bahauddin Zakariya University, Multan (Sahiwal Campus), Pakistan

- **CGPA:** 3.69 / 4.0
- **Final Year Project – Child Monitoring System:** A collaborative platform between parents and children to track a child's location, messages, call logs, contacts, and daily usage time. Native Android apps (Parent App & Child App) built with Firebase Realtime Database and Firestore.
